## Why older investors want Green Bonds

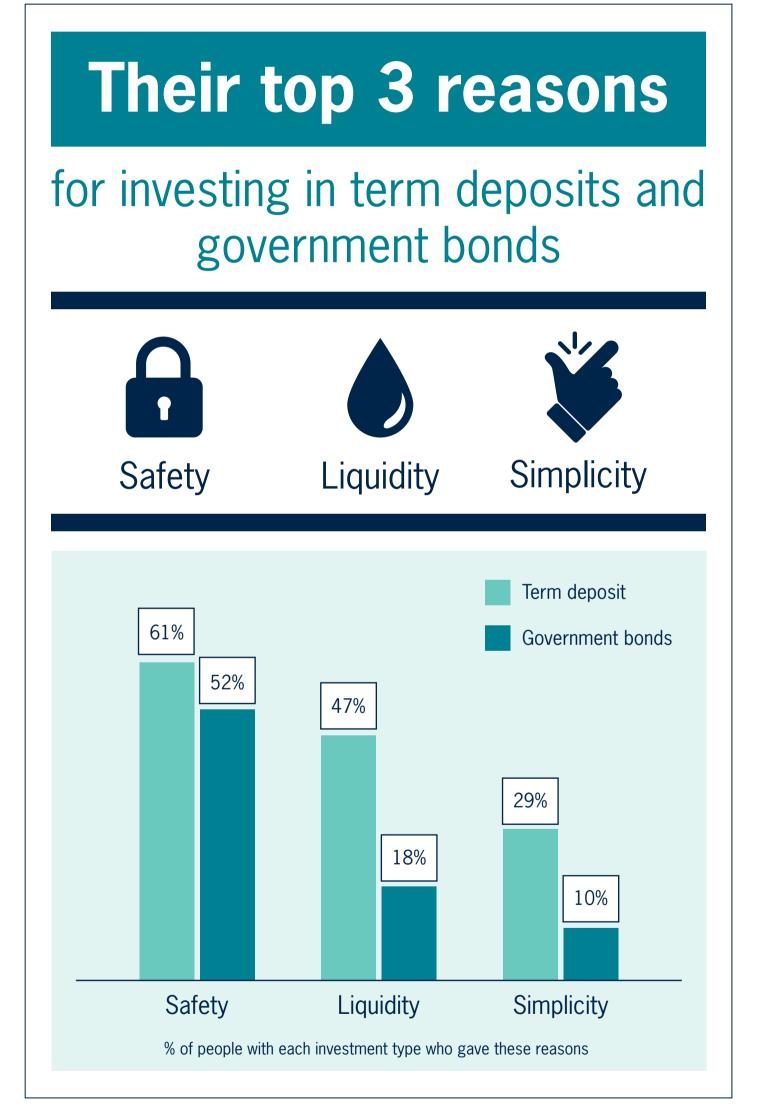

National Seniors
wants the federal government
to make Green Bonds readily
available so that older people can
safely invest in achieving net zero.

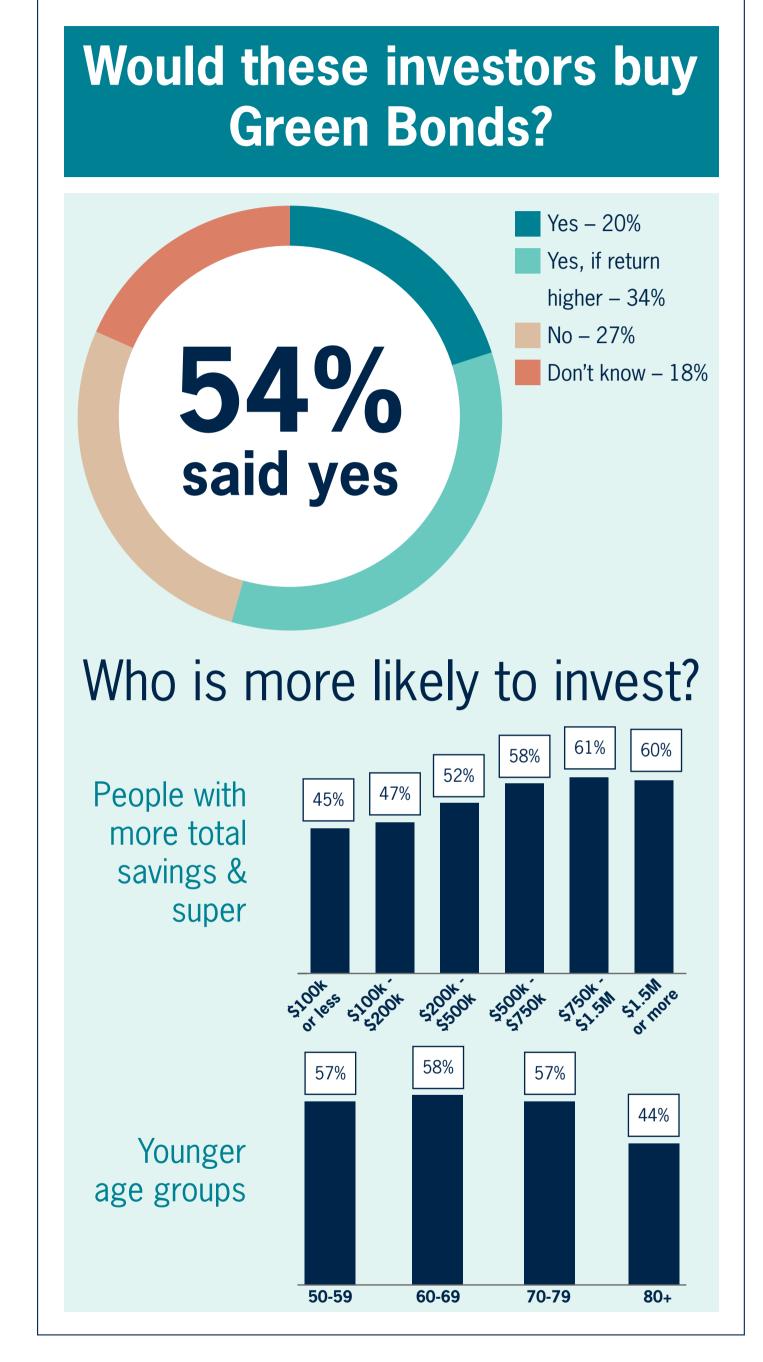

Our research shows older people have an appetite for investment options that are safe, liquid and simple.

Green Bonds could deliver this, if they were easy to buy and sell, offered a modest return and provided a government guarantee.

Green
Bonds are a
practical way to
invest in the
future

**National Seniors** 

AUSTRALIA

Data from 11th National Seniors Social Survey (NSSS-11). Anyone aged 50+ and living in Australia was eligible to participate. Survery conducted February 2023. N=5,417 for term deposit and government bonds questions. Clean Energy Bonds questions only presented to those who had term deposits or government bonds.
